

SUMMARY

- Full Stack Developer with 1.5+ years of experience building scalable web applications using React.js, Next.js, Node.js, and Express.
- Strong in REST API development, authentication systems, and database optimization (MySQL, MongoDB). Experienced in building AI-powered applications using RAG and OpenAI APIs.
- Immediate joiner actively seeking Software Engineer opportunities.

SKILLS

Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS, JavaScript (ES6+)

Backend: Node.js, Express.js, REST APIs

Database: MongoDB, MySQL, Firebase

Other: JWT Authentication, Prisma ORM, RAG, OpenAI API

Tools: Git, GitHub, Postman, CI/CD

PROFESSIONAL EXPERIENCE

Full Stack Developer

Senthuron Tech | Jan 2025 – Mar 2026

- Built full-stack web apps using React.js, Node.js, Express.js, and MySQL
- Developed secure REST APIs with JWT authentication and role-based access
- Improved API performance by ~30% using Prisma ORM and query optimization
- Created reusable UI components and maintained clean, scalable code
- Collaborated with teams and used Git for version control

AI Developer

Spikra | Mar 2026 – Present

- Developed AI-powered applications using ML models and backend APIs
- Built scalable REST APIs to support AI features
- Implemented RAG-based solutions using OpenAI APIs
- Optimized data pipelines for performance and scalability
- Ensured code quality and collaborated with cross-functional teams

PROJECTS

AI Chatbot Mobile App for CA Students | React Native, Node.js, MongoDB, OpenAI API

- ▶ Developed a cross-platform mobile chatbot app using React Native with context-aware responses via RAG pipeline
- ▶ Built and deployed backend APIs on VPS for production-grade scalability and high availability
- ▶ Integrated OpenAI API for intelligent, domain-specific responses tailored to CA exam preparation

AI-Powered Student-Tutor Web Application | Next.js, Express.js, MongoDB, RAG

- ▶ Developed a role-based internal web application with secure authentication and dynamic MongoDB
- ▶ Built responsive, reusable UI components in Next.js + Tailwind CSS; optimized backend(Express) logic for improved usability

NXI – Internal Recipe Management Web Application | React.js, Node.js, Express.js, MySQL, Prisma ORM

- ▶ Developed a role-based internal web application with secure authentication and dynamic MySQL data handling via Prisma ORM
- ▶ Built responsive, reusable UI components in React.js + Tailwind CSS; optimized backend logic for improved usability

ACADEMIC CREDENTIALS

M.Sc. Computer Science

- Bharathidasan University | 2023 – 2025 - 7.6 %

B.Sc. Computer Science

- Bharathiar University | 2020 – 2023 - 7.8 %
